

Since the usage and finishing of the product is not under our control, we accept no liability for the success of the work and can therefore only guarantee the nature of our products as per the accompanying product data sheets and in accordance with our general terms and conditions of sale. The properties listed here represent no guarantee with respect to the eventual use of our products. We reserve the right to make changes due to technical advances. Any other technical information given in the course of a consultation must be confirmed in writing. Colours shown here are restricted by the printing techniques and may differ from those exhibited by the products themselves. We also reserve the right to make alterations to the product technology or design. Only the current version of this data sheet is valid. Such versions are accessible by anyone via the internet. The issue of the latest data sheet invalidates all those that have been published beforehand.

CONSTRUCT *Square*

1/1

One-piece aluminium skirting strip with a square cross-section

- Information Sheet -

APPLICATION:

Whether silver anodised or white powder-coated CONSTRUCT *Square* fits harmoniously in the bright architecture of modern interior design. At just 60 mm high, it produces discrete transitions between flooring surfaces and wall designs and an inside depth of 10 mm also offers ample space for all cable types. Inside and outside corners and terminations are created by a corner piece that can be used anywhere, making it possible to master any interior layout with only two system parts.

INSTALLATION:

Installation is also extremely straightforward – the 250 cm-long skirting strips are simply and securely bonded to the wall using a suitable adhesive for the respective sub-surface. Use a neutral detergent to quickly remove any grease from the skirting underside prior to affixing to the wall. To cut the strips to size, we recommend the use of a mitre saw or manual iron hacksaw with a fine saw blade to obtain a clean profile cut. For the perfect creation of inside or outside corners and terminations, affix the CONSTRUCT *Square* corner piece using the fixing pins supplied and also secure with adhesive as required.

PLEASE NOTE:

Please refer to our detailed installation instructions which are available online at www.dural.com.

The generally recognized rules of good tiling practice must always be observed!

The following applies to all products / materials: Suitability with respect to mechanical and chemical stresses must be checked carefully in each individual case prior to installation.
